SVKM's NMIMS Deemed-to-be University
Mukesh Patel School of Technology Management and Engineering

					w. e. f. 2025-26
Program: MBA Tech (All Programs)				**Semester: II**	
Course: Microeconomics				**Code:**	
Teaching Scheme				**Evaluation Scheme**	
Lecture (Hours per week)	**Practical (Hours per week)**	**Tutorial (Hours per week)**	**Credit**	**Internal Continuous Assessment (ICA) (Marks – 50)**	**Term End Examinations (TEE) (Marks 50)**
2	0	0	2	Marks Scaled to 50	Marks Scaled to 50

Pre-requisite: Basic knowledge of Economics concepts

Course Objectives

- To provide a better understanding and knowledge in the field of microeconomics and its relevance for economic decision-making.
- To develop the basic skills in students required to conduct and interpret research related to microeconomics dealing with issues at various levels in an economy.
- To analyze the impact of changes in microeconomic parameters and policies on economic relations as well as our economy.

Course Outcomes

After completion of the course, students will be able to:

1. Illustrate basic concepts of economics (demand, supply, elasticity, scarcity) and explain behavior on individual, households, and firms and handle economic data and write economic reports,
2. Apply utility analysis and production theories to understand consumer decision-making and cost structures in different market conditions,
3. Understand the impact of Economic Policies and their implication on the Economy,
4. Differentiate between market structures such as monopoly, oligopoly, perfect and imperfect competition, and explain price and output determination.

Detailed Syllabus

Unit	Description	Duration
1	Introduction: Definition of Economics, Problem of Scarcity of Economic Resources, Types of Economic Systems. Demand and Supply Analysis: Demand Curve and Supply Curve, Equilibrium of Demand and Supply, Shift in Demand and Supply. Application of Demand and Supply: Price Elasticity of Demand, Factors which influence Elasticity, Uses of Price Elasticity of Demand, Elasticity and Revenue.	7
2	Utility Analysis and Consumer Behaviour: Introduction to Cardinal and Ordinal Utility, Total Utility and Marginal Utility, Law of Diminishing Marginal Utility, Indifference Curve and Consumer's equilibrium. New Economic Policy: Liberalization, Privatization and Globalization	7
3	Theory of Production: Introduction and Meaning, Short-run and Long-run Production Function, Law of Diminishing Returns and Returns to Scale, Iso-quant Curve and Producer's Equilibrium (Least Cost Combination). Analysis of Costs: Types of Costs and Cost Curves – Total Cost, Fixed Cost, Variable Cost,	6

	Marginal Cost, Relationship between Marginal Cost Curve and Average Cost Curve.	
4	Market Structure /Industry Analysis Types of Competition: Monopoly, Oligopoly, Monopolistic Competition, Perfect and Imperfect Competition. Price and output determination in a perfectly competitive market structure.	6
5	Pricing Practices and Strategies: Cost-plus (mark-up) Pricing, Price Discrimination, Average and Marginal Cost Pricing, Peak Load Pricing; Theory of Games: Introduction, Basics of Game Theory, Prisoner's Dilemma and Nash-equilibrium.	4
	Total	**30**

Text Books

1. Samuelson and Nordhaus, Economics Special Indian Edition, 20th edition Tata McGraw Hill Publication, 2020
2. Mishra and Puri, Indian Economy, 42nd Edition, Himalaya Publishing House, 2024.
